Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Reply

1. The reply filed 01/14/03 consists of remarks related to rejection of claims. The reply does not contain any response to the requirement of a new title. The claims are not allowable as explained below.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Kraft.

Kraft (Figures 1-3) shows a connector 20 comprising an elongated central body with a central longitudinal bore 40 for attachment to a transformer stud 38 and an elongated conductor accommodating body extending along the central body and having a plurality of conductor insertion apertures 30, 32 and a plurality of screw apertures for receiving a plurality of screws 34, 36. The apertures are spaced along a length of the

Art Unit: 2839

conductor accommodating body along a longitudinal direction coextensive with the longitudinal bore of the central body.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kraft.

Kraft shows all the features of these claims as described in Paragraph 3 above except another longitudinal body running along the central body with plurality of conductor accommodating and screw accommodating apertures and the orientation of the second body and the apertures therein. It would have been obvious to one having ordinary skill in the art at the time of the instant invention to provide another longitudinal body running along the central body with a plurality of apertures for accommodating conductors and screws because this would require a mere duplication of an essential part which involve only routine skill in the art. *St. Regis Paper Co. vs. Bemis Co.*, 193 USPQ 8.

As far as the orientation of the second body or apertures therein, the instant invention does not provide any reasons or specific problems to be solved by a specific orientation. Orientation of a part depends on its relation to other parts and space

available and involves only routine skill in the art, which would have been obvious to one of ordinary skill in the art.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McGrarie shows a connector for a transformer stud similar to the one shown by Kraft. Annas et al. shows a plurality of elongated bodies for accommodating a plurality of conductors and screws for a connector used for a transformer stud.

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Response to Arguments

9. Applicant's arguments filed 01/14/03 have been fully considered but they are not persuasive. The conductor insertion apertures 30, 32 are spaced along a length of the conductor accommodating body along a longitudinal direction coextensive with the longitudinal bore of the central body.

Contact Information

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chandrika Prasad whose telephone number is (703) 308-0977.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynn Feild, can be reached at (703) 308-2710. The fax number for this Group is (703) 872-9318 (general) and (703) 872-9319 for after-final.

Any inquiry of a general nature or relating to the status of this application or processing should be directed to the Group receptionist whose telephone number is (703) 308-1782.
